Product Overview

High-Efficiency Portable Compression

This towable diesel screw air compressor is engineered for high energy efficiency and reliable performance in demanding industrial and construction environments. Featuring a compact, robust design, it offers exceptional mobility through its integrated towable trailer system. The unit is built for durability, incorporating noise-reduction technology and environmentally conscious operation to ensure consistent, long-term service on any job site.

Performance

Key Features

High Energy Efficiency, Low Noise Design, Direct Drive, Environmentally Friendly, Towable Design

Construction

Core Components

- Diesel Engine
- Screw Air End
- Air-Oil Separator
- Advanced Cooling System
- Monitoring Control Panel

Operational Standards

Heavy-Duty Build • Weather Protected • Fully Enclosed Canopy
