

Tower Crane Windshield Wiper System

This complete windshield wiper system is designed for tower cranes and other heavy machinery. It features a robust wiper motor, adjustable arm, and standard blade for effective cleaning.

Product Overview

Robust Windshield Cleaning for Heavy Machinery

This complete windshield wiper system is engineered specifically for the demanding environments of tower cranes and other heavy construction machinery. Built for durability and long-term service, the unit features a robust motor housed in a protective enclosure to ensure consistent performance. The system includes an adjustable arm and high-quality blade, providing a reliable solution for maintaining visibility in adverse weather conditions.

Technical Specifications

System Components

- Heavy-duty wiper motor
- Durable protective enclosure
- Integrated manual on/off switch
- Adjustable wiper arm
- Standard heavy-duty wiper blade
- Mounting hardware included

Reliability Metrics

Long Service Life • Construction Grade • Easy Installation

Industry Applications

Tower Cranes, Heavy Machinery, Construction Equipment
