

Tower Style PTC Space Heater

This tower-style PTC heater is designed for space heating. It features a compact, vertical design and user controls on the front panel, making it suitable for providing supplemental heat in small to medium-sized rooms.

Product Overview

Efficient PTC Heating Technology

This tower-style space heater utilizes advanced Positive Temperature Coefficient (PTC) heating elements, known for their superior energy efficiency and inherent self-regulating temperature control. Designed with a compact, vertical footprint, it is an ideal solution for providing supplemental warmth in small to medium-sized rooms. The modern black and silver aesthetic, combined with user-friendly front-panel controls, makes it both a practical and stylish addition to any workspace or office environment.

Design & Construction

Form Factor	Tower Style
Color Scheme	Black, Silver

Technical Features

Heating Element	PTC (Positive Temperature Coefficient)
Control Location	Upper front panel
