

Track Roller for Construction Machinery

This heavy-duty track roller is designed for construction machinery. It provides smooth and reliable operation for tracked vehicles with excellent carrying capacity and abrasive resistance.

Product Overview

Heavy-Duty Construction Track Roller

This track roller is engineered for high-performance construction machinery, providing exceptional load-bearing capacity and smooth operation. Designed with advanced sealing technology and high-wear resistance, it ensures long-term reliability in the most demanding working environments. Precision engineering minimizes friction and optimizes load distribution to enhance overall machine longevity.

Technical Details

Core Benefits

- Optimized load distribution
- Reduced operational friction
- Advanced environmental sealing
- High-durability material composition

Compatible Model Codes

KM71, GH150
