

Track Roller Idler Wheel for Construction Machinery

Heavy-duty track roller idler wheels are designed for construction machinery. These components ensure the smooth and reliable operation of tracked vehicles.

Product Overview

Heavy-Duty Track Roller Idler

This heavy-duty track roller idler is engineered for optimal performance and durability in demanding construction environments. Designed to prevent tracking deviation and derailment, it ensures smooth and reliable operation for heavy machinery. With a robust bearing system for efficient load distribution, this component is built to extend lifespan and reduce maintenance downtime.

Technical Specifications

Key Features

- Robust bearing system
- Smooth rotation
- Efficient load distribution
- Anti-deviation design

Reference Part Numbers

3000 • 3531

Component Type

Track Roller Idler Wheel

Compatible Machinery

Bulldozers, Excavators, Construction Machinery
