

Traction Lead-Acid Storage Battery

This is a traction LA storage battery. It provides power for a variety of applications.

Product Overview

Industrial Traction Solutions

These lead-acid storage batteries are engineered for heavy-duty traction applications, offering reliable energy storage for industrial mobility. Designed with a durable rectangular prism form factor, they ensure stability and efficient space utilization in battery banks. Available with distinctively color-coded caps, these batteries are built to perform in demanding environments where consistent power delivery is essential.

Physical Characteristics

Cap Color Coding

Green • Black • Blue

Form Factor

Rectangular prism with rounded edges

Technology

Lead-Acid, Traction
