Overview

High-Efficiency Precision Seeding

This tractor-mounted precision corn planter is engineered for modern agricultural demands, offering highly accurate single or double seed placement. It integrates multiple field operations into one pass, including furrowing, fertilizing, seeding, soil covering, and pressing. By maximizing seed spacing precision, it helps farmers optimize crop yield and significantly reduce seed wastage.

Technical Specifications

Operational Functions

- Furrowing
- Fertilizing
- Seeding
- Covering earth
- Pressing

Tractor Compatibility	15-80 hp tractors
Seeding Configuration	Single grain precision, Double grain seeding
