

Trailer Mounted Sprayer Unit

This trailer-mounted sprayer unit is engineered for mobile applications across agricultural, landscaping, and industrial environments. It incorporates a tank, gasoline engine, pump, and hose reel, all mounted on a trailer chassis for enhanced maneuverability.

Product Overview

Mobile Spraying Solution

This trailer-mounted sprayer unit is engineered for versatile mobile applications across agricultural, landscaping, and industrial sectors. The integrated system features a robust tank reservoir, a dedicated gasoline engine to drive the pump, and a convenient hose reel for efficient fluid management. Mounted on a durable trailer chassis, this unit offers excellent maneuverability and ease of transport to various job sites.

System Components

Included Components

- Liquid storage reservoir
- Gasoline engine
- High-pressure pump
- Integrated hose reel
- Trailer chassis

Primary Applications

Agriculture, Landscaping, Industrial Spraying

Design Features

Mobility

Trailer Mounted • Mobile
