

Transparent C-Type Terminal Block

C-type terminal blocks provide secure and reliable electrical connections. Featuring a clear housing, these blocks allow easy visual inspection of wire placement.

Overview

Transparent C-Type Terminal Block

The C-series terminal block is designed for reliable electrical continuity and branching-off connections. Featuring a transparent housing, these units allow for easy visual inspection of wire placement, ensuring secure and safe installations. Built to international standards, these blocks offer robust performance for diverse electrical applications.

Technical Specifications

Maximum Operating Temperature	85 °C
Heat Resistance	130 °C
Compliance Standards	EN60998-1, EN60998-2-1

Construction

Material Composition

Component	Material
Insert	Brass
Screws	Zinc Plated Steel
Insulating Body	Polycarbonate

Available Pole Configurations

- 1
- 2
- 5
- 10
