

Transparent Gray Plastic Container with Handle

This transparent gray plastic container is designed with a cylindrical inner section. It also features a handle on the side for easy handling.

Product Overview

Industrial Precision Component

This transparent gray plastic container is designed for specialized industrial applications, featuring a robust cylindrical inner section and an integrated side handle. Its durable construction makes it an ideal solution for holding liquids or small technical components within electronic assemblies. The transparent design allows for quick visual inspection of the contents while maintaining a compact and functional form factor.

Physical Attributes

Color and Finish	Transparent Gray
Material	Industrial Grade Plastic

Design Features

Key Features

- Cylindrical inner chamber
- Integrated side handle for easy manipulation
- Transparent body for contents visibility

Application

Primary Applications

Electronics Component • Fluid Storage • Small Parts Management
