

Trimming Dozer

The trimming dozer is a robust machine designed for precision earthmoving tasks. It efficiently handles grading, leveling, and trimming operations with its powerful engine and durable blade.

Product Overview

Versatile Trimming Power

The SB13 trimming dozer is engineered for high-efficiency clearing and leveling tasks across demanding environments like ports, factories, and docks. It features a high-torque reserve engine designed for low fuel consumption and consistent, reliable performance. The integration of power shift transmission ensures flexible and convenient operation, making it a dependable choice for complex material handling.

Performance

Key Performance Metrics

130 HP

Engine Horsepower Class

Primary Applications

Port Material Handling, Factory Stacking, Dock Operations, Earthmoving, Grading and Leveling

Technical Features

Operational Features

- Power shift transmission
- High torque reserve coefficient engine
- Adjustable blade angles
- Optimized weight distribution
- Ergonomic cabin design

Maintenance

Yes
