

Triplex Mud Pump Piston

This piston is made of premium materials and is designed for use in triplex mud pumps. It is engineered for efficient sealing and smooth operation.

Product Overview

High-Performance Mud Pump Solutions

This triplex mud pump piston is engineered for superior sealing and durability in the most demanding drilling environments. Designed to meet or exceed API-7K standards, it offers significant operational cost savings through an extended service life. The construction features a wear-resistant elastomer layer paired with a robust metal core to ensure consistent performance under extreme field conditions.

Technical Specifications

Available Types

- Urethane Bonded Pistons
- Replaceable Rubber Pistons

Quality Standards

API-7K

Part Reference

7K-0448

Operational Benefits

Why Choose This Piston

Cost Savings • Extended Service Life • Extreme Environment Performance • OEM Interchangeable
