

Truck Brake Drum

This brake drum is made from gray iron HT250/GG25. It is suitable for trucks and offers a hardness of 163-255HBS.

Product Overview

Heavy-Duty Braking Performance

This heavy-duty brake drum is engineered for optimal braking performance and durability in demanding commercial vehicle applications. Constructed from high-quality materials, it is designed for enhanced heat dissipation and superior resistance to wear. The precision-machined braking surface ensures consistent and reliable stopping power, promoting safe and efficient operation under diverse driving conditions.
