Product Overview

High-Efficiency Truck Carriage Plate Production

This professional roll forming machine is specialized for the manufacture of high-quality, wide-width car body panels for light trucks. Utilizing automated production technology, it ensures high raw material utilization and precise assembly efficiency. The system incorporates comprehensive stations including unwinding, straightening, forming, and automatic spot welding to deliver durable and aesthetically superior components.

Technical Specifications

Equipment Components

- Unwinder
- Forming Host Equipment
- Straightening Device
- Automatic Tracking Spot Welding
- Waste Receiving/Recycling Table
- Control Cabinet

Primary Applications

Light Truck Body Panels, Wide-width Board Molding, Automotive Cabin Equipment, Industrial Vehicle Components

Sustainability
