

Truck Mounted Crane

This truck-mounted crane provides a mobile lifting solution. Its hydraulic crane system and robust chassis enable versatile lifting operations.

Product Overview

Professional Truck-Mounted Crane Solution

This truck-mounted crane utilizes a heavy-duty special chassis for superior durability and reliable performance in demanding environments. Featuring a high-strength hexagonal section arm and a 360-degree rotation system, it offers exceptional operational flexibility and lifting capacity. The inclusion of imported key components and an easy-maintenance flange-connected telescopic cylinder ensures a long service life and high efficiency for professional industrial applications.

Key Features

Heavy-duty chassis, High-strength steel, 360-degree rotation, Easy maintenance, Imported components

Performance Metrics

Key Performance Indicators

6.3 Tons

Max Lifting Weight

140 kN-m

Max Hoisting Torque

132 kW

Engine Power

Technical Specifications

Vehicle Specifications

Parameter	Specification
Model	YTZ5120JSQ20E
Driving Type	4x2
Cab	Flat-roofed
Engine Power	180 PS
Max Working Range	9.25 m
Max Working Height	11.0 m

Crane Operation

- Rotation Angle: 360°
- Luffing Angle: 0° - 76°
- Outrigger Span: 2250 / 5250 mm
