Product Overview

Professional Truck Winch Rigging Accessory

This robust rigging accessory is engineered to enhance the safety and functionality of truck winch operations. Designed for heavy-duty applications within the trucking and recovery industries, it features a durable, high-strength metal construction. The component includes multiple attachment points to support versatile rigging configurations and ensures reliable performance under demanding conditions.

Compliance & Certification

Safety Certifications	TÜV Rheinland, GS Certified, CE Certified
Patent Information	US Patent 7,610,021

Technical Specifications

Key Features

- Multiple attachment points
- Blue band load identification
- Heavy-duty construction

Industry Suitability

Trucking • Recovery • Heavy-duty Lifting

Material	High-strength metal
