

# Trumpet and Buzzer Speaker

This speaker integrates both trumpet and buzzer capabilities. It is suitable for diverse audio applications in commercial and residential settings.

## Product Overview

### Versatile Audio Alert Solution

The Trumpet and Buzzer Speaker provides a reliable dual-mode audio output suitable for professional signaling and industrial notification environments. This versatile unit combines the directional projection of a trumpet speaker with the immediate attention-grabbing capability of a buzzer. Engineered for durability and performance, it is an essential component for safety and communication systems in demanding B2B applications.

## Technical Specifications

### Application Fields

- Industrial Signaling
- Emergency Warning Systems
- Public Address
- Process Automation Alerts

### Device Components

Trumpet Speaker, Buzzer
