

Tube Cutter for Copper and Metal Tubing

This tube cutter is designed for cutting copper, brass, aluminum, and thin-walled steel tubing. It features a durable cutting wheel and rollers for smooth and precise cuts.

Product Overview

Professional Grade Tube Cutter

This compact tube cutter (Model PC-217) is engineered for precision and durability in demanding environments. Designed to handle copper, brass, aluminum, and thin-walled steel tubing, it ensures smooth, clean cuts every time. It is an essential tool for professionals working in plumbing, HVAC, and general mechanical repair.

Technical Specifications

Design Features

- Compact design for tight spaces
- Durable hardened cutting wheel
- Precision rollers for smooth rotation
- Ergonomic adjustment knob

Model Number	PC-217
Compatible Materials	Copper, Brass, Aluminum, Thin-walled Steel

Applications

Primary Applications

Plumbing • HVAC Installation • Mechanical Repair • General Fabrication
