

Tube Cutter

This tube cutter is compact and durable, designed for cutting copper, brass, aluminum, and thin-walled steel tubing. It features a hardened steel cutting wheel and a smooth turning knob for precise and clean cuts.

Product Overview

Professional Grade Tube Cutter

The PC-216 Tube Cutter is a compact and durable tool engineered for high-precision cutting tasks. It is specifically designed to handle copper, brass, aluminum, and thin-walled steel tubing with ease. Featuring a hardened steel cutting wheel and a smooth-turning adjustment knob, this tool ensures clean, professional-grade cuts for plumbing, HVAC, and industrial maintenance applications.

Technical Specifications

Key Features

- Hardened steel cutting wheel for durability
- Smooth turning knob for precise adjustments
- Compact design for tight workspaces
- Clean, burr-free cutting performance

Model Number	PC-216
Compatible Materials	Copper, Brass, Aluminum, Thin-walled Steel

Applications

Suitable Industries

Plumbing • HVAC • General Maintenance
