

Tuner Module for Radio and TV Broadcasting

This tuner module is designed for radio and television broadcasting. It is equipped with a shielded enclosure and pins for secure PCB mounting, providing reliable signal reception and processing.

Product Overview

Professional Broadcasting Tuner Module

The DTT-6A series tuner module is engineered for high-performance radio and television signal reception. Featuring a robust shielded enclosure, this module ensures reliable signal processing and stability for integration into various audio-video systems. It utilizes a secure multi-pin configuration for stable PCB mounting, making it an ideal choice for professional-grade broadcasting applications.

Technical Specifications

Model Series	DTT-6A
Part Identifier	DTT-6A/W146

Compliance and Standards

Compliance Badges
ROHS

Design Features

Housing	Robust shielded enclosure
Mounting Type	PCB through-hole mounting
