Product Overview

Professional TCT Saw Blade

This high-quality Tungsten Carbide Tipped (TCT) saw blade is engineered for precision and efficiency across a wide range of industrial applications. Featuring wear-resistant carbide tips, it ensures an extended service life and consistent cutting accuracy. Its advanced design incorporates an alternating tooth bevel, allowing for rapid material removal while maintaining a smooth, high-quality finish.

Technical Specifications

Compatible Materials	Wood, Plastic, Non-ferrous metals
Tooth Geometry	Alternating tooth bevel

Quality & Standards

Key Features

- High-durability carbide tips
- Wear-resistant construction
- Advanced cutting edge technology
- Optimized for smooth finish
