Product Overview

Professional Scoring Performance

This Tungsten Carbide Tipped (TCT) scoring saw blade is engineered for high-precision applications in laminated panels and MDF. Designed for horizontal panel cutting machines, it provides vertical adjustment capability to perfectly match the main saw blade kerf. Its advanced ATB tooth geometry and positive cutting angles ensure a clean, chip-free finish on delicate surfaces.

Technical Details

Tooth Configuration	ATB (Alternate Top Bevel)
Cutting Angles	Positive

Compatibility

Machine Compatibility	Horizontal panel cutting machines
-----------------------	-----------------------------------

Materials

Compatible Materials

- Laminated panels
- MDF board

Features

Key Benefits

Tungsten Carbide Tipped • Anti-splintering • High-precision finish • Durable construction
