

Tungsten Carbide Tipped Wood Saw Blade

This circular saw blade is designed for woodworking applications. It features tungsten carbide tipped (TCT) teeth for enhanced durability and cutting performance, making it suitable for cutting various types of wood, including hardwoods, softwoods, and composite materials.

Product Overview

Precision Woodworking Performance

This circular saw blade is specifically engineered for professional woodworking applications, featuring high-grade tungsten carbide tipped (TCT) teeth. Its advanced tooth geometry is designed to provide clean, efficient cuts across various materials, significantly reducing splintering and tear-out for a professional finish. The durable construction ensures longevity, making it an ideal choice for intensive use in table saws, miter saws, and other circular saw equipment.

Technical Specifications

Machine Compatibility

- Table Saws
- Miter Saws
- Circular Saws

Key Advantages

1 High

Durability Rating

1 Smooth

Cut Quality

Tipped Material

Tungsten Carbide

Suitable Materials

Hardwood, Softwood, Composite Materials
