

Tungsten Carbide Tipped Wood Saw Blade

This tungsten carbide tipped saw blade is designed for lengthwise, cross, and trimming cuts. It is suitable for use on soft and hard wood, coated and veneered particle board, fibreboard, and plastics.

Product Overview

Professional T.C.T. Saw Blade

This high-performance tungsten carbide tipped (T.C.T) saw blade is engineered for versatile woodworking applications, including lengthwise, cross, and trimming cuts. Designed for professional use, it delivers precision-ground performance on softwoods, hardwoods, veneered particle boards, and polymer materials like plexiglas. Its durable construction ensures long-lasting wear resistance for clean, splinter-free results in various professional workshop environments.

Technical Specifications

Blade Diameter	300 mm
Kerf Thickness	3.2 mm
Bore Diameter	30 mm
Tooth Count	80

Compatibility

Compatible Machinery

- Circular saws
- Table saws

Suitable Materials

Softwood, Hardwood, Particle board, Veneered board, Fibreboard, Plexiglas, Polymer materials
