

Twin-Cylinder Silent Gasoline Generator

This twin-cylinder silent gasoline generator provides a robust and reliable power solution for various applications. Featuring a twin-cylinder gasoline engine, it ensures efficient and stable power output while its silent operation makes it suitable for noise-sensitive environments.

Overview

Reliable Power Generation Solution

This twin-cylinder silent gasoline generator is engineered for stable and efficient power output in noise-sensitive environments. Designed for versatility, it serves as an excellent solution for backup, mobile, and off-grid power needs. With integrated safety systems like overload protection and low oil shutdown, it ensures dependable performance and secure operation for professional applications.

Technical Specifications

Engine Configuration	Twin-cylinder OHV gasoline engine
Operational Frequency	50 Hz

Key Features

Control System

- Key switch start
- Integrated voltage regulator
- Monitoring systems

Noise Reduction	Yes
Safety Features	Overload Protection, Low Oil Shutdown

Portability and Design

Mobility	Wheel-mounted for easy transport
