

Twin Tub Washing and Spin Dryer

This compact machine features separate compartments for washing and spin-drying, enabling simultaneous operation. Designed for ease of use and long-lasting performance, it is well-suited for households with limited space and small to medium laundry needs.

Product Overview

Compact Laundry Solution

The XQB60-600S is a specialized twin-tub washing and spin-drying machine designed to maximize laundry efficiency in limited spaces. By featuring separate compartments for washing and spinning, this unit allows for simultaneous operation to save time during busy cycles. Its robust construction and user-friendly control interface make it a reliable choice for professional settings requiring agile, small-to-medium volume laundry processing.
