

Twin-Tub Washing Machine Induction Motor

This induction motor is designed for twin-tub washing machines. Operating at 220V, 50Hz, it features a 60W power rating and a 4-pole configuration.

Product Overview

High-Efficiency Induction Motor

This robust induction motor is engineered specifically for twin-tub washing machine applications. Designed for reliability and performance, it features a 4-pole configuration and delivers consistent rotational speed for effective spin cycles. With optimized efficiency and low noise operation, this motor is a dependable component for laundry appliance manufacturing.

Technical Specifications

Performance Metrics

1300 r/min

Rotational Speed

0.65 N.m

Maximum Torque

52 dB

Noise Level

40 %

Efficiency

Electrical Characteristics

Parameter	Value
Voltage	220V
Frequency	50Hz
Power Rating	60W
Current	0.75A
Capacitance	5 μ F
Capacitor Voltage	450VAC

Physical Properties

Physical Dimensions & Load

- Stacking thickness: 21.5mm
- Standard load capacity: 5.5kg

Compliance & Standards

Compliance	IP00, Class B Insulation, 4-Pole
