

Twin Tub Washing Machine with Separate Wash and Spin Tubs

This washing machine features a twin-tub design with individual compartments for washing and spinning. It is equipped with a control panel that allows users to adjust wash settings and timers.

Product Overview

Efficient Dual-Tub Laundry Solution

This twin-tub washing machine features a highly efficient design with separate compartments for washing and spinning, allowing for simultaneous laundry processing. Engineered for convenience, it incorporates advanced features like spray rinsing and a built-in washboard for enhanced cleaning performance. The robust construction includes a durable tempered glass door cover to ensure longevity and operational reliability in professional environments.
