

Two-Legged Steel Chain Sling with Hooks

This two-legged chain sling is designed for lifting and moving heavy loads. It is constructed from durable steel chains and features robust hook attachments for secure connections.

Product Overview

Heavy-Duty Lifting Solution

This two-legged steel chain sling is engineered for the secure lifting and movement of heavy loads in demanding environments. Constructed from high-durability steel chains, it provides the reliability needed for industrial and construction operations. The inclusion of robust hook attachments ensures stable and safe connections during material handling tasks.

Technical Specifications

Configuration	Two-Legged
Material	Steel
End Fittings	Hooks

Applications

Recommended Applications

- Industrial lifting
- Construction site material handling
- Heavy load transport
