

Two-Part Epoxy Steel Adhesive

This two-part epoxy steel adhesive is designed for strong and durable repairs. When mixed, the resin and hardener create a powerful bond suitable for various materials.

Product Overview

High-Strength Two-Part Epoxy

This two-part epoxy steel adhesive is engineered for robust and durable repairs across a wide range of surfaces. The system consists of separate resin and hardener components that, when mixed, form an exceptionally strong bond suitable for automotive, household, and industrial maintenance tasks. It provides a reliable, long-lasting solution for bonding metal, plastic, and other rigid materials effectively.

Technical Specifications

Compatible Materials

- Metal
- Plastic
- General Rigid Surfaces

System Type

Two-Part System • Resin & Hardener

Net Weight

20 g

Part Number

M4700

Suitable Applications

Automotive, Household, Industrial
