

Two-Post Automotive Lift

This heavy-duty lift utilizes a leaf chain and electric/hydraulic operation. It features simple controls and automatic arm restraints.

Overview

Versatile Automotive Lifting Solution

This two-post lift provides a reliable and heavy-duty solution for lifting cars, light trucks, and vans. Designed for automotive repair shops and maintenance facilities, it features an electric/hydraulic operation with automatic safety systems for enhanced reliability. Its low-profile design and space-efficient construction make it an ideal choice for garages with low ceiling heights.

Technical Specifications

Construction Material	12mm integrally formed steel plate
Mechanism	Electric/hydraulic
Safety Features	Automatic safety system, Automatic arm restraints, Heavy-duty leaf chain

Operational Details

Applicable Vehicles

- Passenger cars
- Light trucks
- Vans

Typical Applications

- Vehicle washing
- General repair
- Component assembly

Design Highlights

Low profile • Low ceiling compatible • High strength
