

# Two-Post Automotive Lift

This two-post lift is designed for automotive maintenance and repair. It features adjustable arms to accommodate different vehicle sizes, along with a hydraulic system for smooth lifting.

## Overview

### Professional Two-Post Automotive Lift

This two-post lift is engineered for reliable automotive maintenance and repair tasks. Featuring a robust construction, it provides a stable and efficient platform for servicing various vehicle sizes. The system utilizes advanced hydraulic synchronization and integrated safety features to ensure a secure working environment for professional technicians.

## Performance

### Lifting Capacity

**4000 Kg**

Maximum Capacity

### Lift Dimensions

Specification	Value
Minimum Lifting Height	100 mm
Maximum Lifting Height	1850 mm
Overall Height Range	3612-3912 mm

## Safety & Mechanics

### Key Features

- Single-point manual lock release
- High-quality power unit with aluminium motor
- Synchronization via double hydraulic cylinders
- Steel cable synchronization system
- Top position limit switch
- 24V safety control voltage

### Safety Certifications

24V Safety Control • Overload Protection
