

Two Post Hydraulic Vehicle Lift

This two-post hydraulic vehicle lift features dual hydraulic cylinders for reliable performance. It offers a 3600kg lifting capacity and includes automatic arm restraints for added safety.

Overview

Professional Vehicle Lifting Solution

This two-post hydraulic vehicle lift is designed for professional automotive maintenance and repair environments. Featuring a clearfloor design, it eliminates floor obstructions to allow operators to work easily under vehicles. The system utilizes dual hydraulic cylinders with electric/hydraulic operation to provide smooth, controlled lifting for cars, light trucks, and vans.

Performance Specifications

Lifting Capacity

3600 kg

Lifting Capacity

Operation Type

Electric/Hydraulic

Design & Safety

Vehicle Compatibility

- Cars
- Light Trucks
- Vans

Design Features

Clearfloor Model, Dual Hydraulic Cylinders, Low-Profile, Automatic Arm Restraints

Lift Pads

Low profile hard rubber
