

Two-Tier Flat Car with Retractable Handle

This flat car has two tiers and a retractable handle. It is made of durable plastic and has smooth-rolling wheels.

Product Overview

Efficient Two-Tier Transport Solution

This two-tier flat car is designed for versatile material handling in professional environments. Featuring a durable plastic platform and a retractable handle, it ensures both longevity and ease of storage when not in use. The dual-tier design maximizes vertical space, allowing for efficient transportation of goods in warehouses, offices, or retail settings.
