

U-Shaped Metal Nails

U-shaped nails are typically made of metal and designed for securing materials. These nails feature two sharp points for easy insertion and a curved body for added strength.

Product Overview

Versatile U-Shaped Metal Staples

U-shaped metal nails, commonly referred to as fencing staples, are engineered for high-performance material securing. Featuring a dual-point design for smooth insertion and a curved body to maximize structural integrity, these staples provide a reliable fastening solution. They are highly effective for professional applications ranging from heavy-duty agricultural fencing and construction projects to precision upholstery work.

Physical Properties

Nail Shape	U-shaped
Primary Feature	Dual sharp points, Curved body, Reinforced strength

Applications

Common Applications

- Agricultural fencing
- General construction
- Upholstery assembly
