

# U-Type Double Girder Gantry Crane

The U-type gantry crane is a double-girder crane suitable for open freight yards and railway operations. Its large leg space makes it ideal for lifting large volumes of goods and containers.

## Product Overview

### U-Type Double Girder Gantry Crane

The U-type double girder gantry crane is a high-capacity material handling solution engineered for demanding open freight yards and railway operations. Featuring an expansive leg space, it is specifically designed to facilitate the lifting of large volumes of goods and standard containers. This mature, widely utilized design provides a reliable, safe, and smooth operating experience for heavy-duty industrial environments.

## Operational Details

Crane Classification	Double Girder Gantry
Ideal Environments	Open Freight Yards, Railway Operations, Container Handling, Industrial Manufacturing

## Key Features

### Performance Features

- Large leg space for bulky load clearance
- Smooth running performance
- Mature, proven technology
- Safe and reliable operation
- Easy to operate control systems
