

# Ultra-Thin Diamond Saw Blade with Laser Slotting

This ultra-thin diamond saw blade is designed for precision cutting. Laser slotting enhances performance, while hot-pressed construction ensures durability.

## ADDITIONAL IMAGES

## Product Overview

### Precision Cutting Performance

This ultra-thin diamond saw blade is engineered for high-precision cutting tasks, featuring advanced laser slotting to enhance cooling and debris removal. Its hot-pressed construction significantly increases durability and extends the tool's lifespan for demanding professional use. Designed for versatility, this blade delivers clean, chip-free cuts with minimal material waste across a variety of hard surfaces.

## Technical Specifications

### Compatible Materials

- Ceramic Tile
- Porcelain
- Stone

### Manufacturing Process

Hot Pressed • Laser Slotted

### Cutting Capabilities

Wet Cutting, Dry Cutting, Chip-free, Low Vibration

## Tool Compatibility

### Compatible Tools

- Angle Grinder
- Tile Saw
