

Ultrasonic Cool Mist Humidifier

This ultrasonic humidifier increases humidity by releasing a cool mist into the air. It automatically shuts off and beeps when the water reservoir is empty.

Overview

High-Efficiency Ultrasonic Humidification

This Ultrasonic Cool Mist Humidifier utilizes high-frequency sound waves to generate an ultra-fine mist, effectively increasing ambient humidity for improved comfort. Designed with a compact, tabletop footprint and quiet operation, it is ideal for residential spaces including bedrooms and nurseries. Safety and ease of use are prioritized through features like adjustable mist control and an automatic empty-tank shut-off mechanism.

Performance

Moisture Output

2.7 gallons

Max Daily Output
