

Ultrasonic Dog Bark Deterrent Device

This device uses ultrasonic sound to deter dogs from excessive barking. It incorporates an ultrasonic emitter and an audio detection system.

Product Overview

Advanced Ultrasonic Bark Control

This ultrasonic dog bark deterrent device is designed to manage excessive barking through non-invasive audio technology. It features a built-in audio detection system that automatically triggers an ultrasonic emitter when barking is detected. With adjustable sensitivity settings, this device offers a customizable solution for maintaining a quiet environment for both residential and commercial settings.

Technical Features

Detection System	Audio-based detection
Emission Technology	Ultrasonic
Sensitivity Adjustment	Yes
Integrated Test Button	Yes

Device Controls

Control Interface

- Sensitivity Adjustment Dial
- Test Button
- Ultrasonic Output Control
- Audio Detection Input

Primary Application	Bark Control, Noise Management, Pet Training Support
