Product Overview

Efficient Umbrella-Shaped PTC Heater

This umbrella-shaped PTC space heater provides reliable and rapid heating for outdoor and indoor environments. Featuring advanced PTC heating technology and a built-in fan, it delivers consistent warmth while maintaining safety through overheat protection and a durable IP34 waterproof design. The unit is designed for ease of use, featuring remote control operation and a stable base for floor-standing installation.

Performance Metrics

Power Output

2000 W
Max Power

Heating Technology

PTC (Positive Temperature Coefficient)

Technical Specifications

Waterproof Rating

IP34

Voltage

220V-240V

Frequency

50 / 60Hz

Safety & Features

Key Features

- Overheat protection
- Remote controlled
- Fan-assisted air distribution
- Concrete balance weight for stability
- Green and red indicator lights

Certifications

CB, CE, GS, UL

Design & Installation

Housing Material

Plastic

Installation Type

Freestanding
