

Underwater Lighting Fixtures

High-intensity underwater lighting fixtures designed for various applications. Available in different wattages (100W, 150W, and 250W), they provide flexibility in illumination intensity and are suitable for pools, fountains, and aquariums.

Product Overview

Professional Underwater Lighting

These high-intensity underwater lighting fixtures are engineered for durability in demanding marine environments. Featuring a corrosion-resistant housing, they provide reliable illumination for diverse applications including pools, fountains, and aquariums. Their optimized optical design ensures superior light projection and clarity underwater.

Technical Specifications

Available Wattages

- 100
- 150
- 250

Housing Type	Corrosion-resistant
Suitable Applications	Pools, Fountains, Aquariums, Marine Environments

Operational Features

Maintenance

Easy Installation • Low Maintenance
