

Uninterruptible Power Supply Battery Pack

This is a high-performance uninterruptible power supply (UPS) battery pack. It provides reliable backup power for critical electronic equipment, ensuring continuous operation during power outages.

Product Overview

Reliable Backup Power Solution

This high-performance battery pack is engineered specifically for uninterruptible power supply systems, providing critical backup energy for sensitive electronic equipment. Designed to ensure continuous operation during power outages, it protects your hardware from the risks of voltage fluctuations and unexpected surges. With a robust construction and long service life, it offers a dependable solution for both standby and cycle use scenarios.

Technical Specifications

Supported Usage Modes

- Cycle Use
- Standby Use

Battery Type	Sealed Lead-Acid, Rechargeable
Charging Method	Constant Voltage Charge
