

Uninterruptible Power Supply with Surge Protection

This uninterruptible power supply (UPS) offers reliable backup power during outages. It features surge protection and voltage regulation to safeguard sensitive electronics like computers and servers.

Overview

Professional Power Protection

This Uninterruptible Power Supply (UPS) system is engineered to provide reliable backup power and essential protection against electrical disturbances. Designed for mission-critical environments, it safeguards sensitive equipment like servers and networking hardware from outages, brownouts, and voltage fluctuations. Its robust architecture ensures continuous operation and equipment longevity during unstable grid conditions.

Key Features

Integrated Protections

Surge Protection, Battery Backup, Voltage Regulation

Applications

Supported Equipment

- Computers
- Servers
- Networking Devices

System Capabilities

Power Disturbance Mitigation

Condition	Action
Blackout	Continuous backup power
Brownout	Stabilized output
Voltage Fluctuation	Regulated output
