

Universal AC Motor for Blenders, Coffee Makers, and Juicers

This universal AC motor is designed for use in blenders, coffee makers, and juicers. It features a compact design with a robust metal frame and high-efficiency stator winding.

Overview

High-Performance Universal AC Motor

This universal AC motor is engineered for versatility and durability in small kitchen appliances, including blenders, coffee makers, and juicers. It features a compact design with a robust metal frame, ensuring longevity in demanding environments. Equipped with a precision-engineered rotor and high-efficiency stator winding, this motor delivers reliable performance across various voltage and frequency requirements.

Technical Specifications

Construction Features

- Robust metal frame
- Precision-engineered rotor
- High-efficiency stator winding
- Compact design

Key Performance Metrics

1 High

Efficiency Rating

Compatible Appliances	Blenders, Coffee Makers, Juicers
Motor Type	Universal AC Motor
