Overview

Universal Battery Charging Solution

This universal battery charger provides a versatile and compact solution for powering AA and AAA Ni-MH and Ni-CD rechargeable batteries. Featuring four independent charging slots and a convenient Micro USB input, it allows for flexible charging from various power sources. The unit is engineered with an ABS shell for durability and multiple heat dissipation vents to ensure safe, efficient performance during operation.

Technical Specifications

Input Power

5 V

Voltage

1 A

Current

Output Specifications

1.53 V

Voltage

0.4 A

Current per slot

Charging Slots	4 slots
Charging Model	Constant Current Pulse

Physical Attributes

Dimensions	86mm x 71mm x 36mm
Weight	66.6 g
