

# Universal Milling Machine with Auto-Feed

This universal milling machine features a headstock that swivels  $\pm 45$  degrees. The vertical milling spindle and X/Y/Z axes offer auto-feeding capabilities.

## ADDITIONAL IMAGES

## Product Overview

### Professional Universal Milling Solution

This high-performance universal milling machine is engineered for versatility and precision in professional machining environments. Featuring a swiveling head and comprehensive multi-axis auto-feed capabilities across the X, Y, and Z axes, it supports complex operations including drilling, slotting, and shaping. Its robust construction ensures stability during intensive metal cutting tasks, making it a reliable asset for both toolrooms and industrial workshops.

## Key Features

### Operational Features

- Headstock swivels  $\pm 45$  degrees
- Vertical milling spindle auto-feed
- X/Y/Z axis automatic feeding
- Integrated coolant system for thermal management
- Precision T-slot worktable for secure clamping

## Compliance and Standards

### Quality Standards

CE, Industrial Grade

## Safety

### Integrated Safety

- Emergency stop button
- Protective chip guard
- Accessible maintenance ports
