

Universal Plug Adapter

This plug adapter is designed for converting between different plug types. It features robust construction and is rated for 10A 250V, 50/60Hz.

Product Overview

Universal Plug Adapter

This universal plug adapter is designed for reliable power transmission across different electrical standards. Constructed with durable ABS material and high-quality copper components, it ensures a secure and efficient connection for various applications. It is engineered to handle standard electrical loads, making it a versatile tool for international power compatibility.
