

Universal Tool Milling Machine

This universal tool milling machine is designed for a wide range of milling operations. It features robust construction and precise control mechanisms.

Overview

Versatile Precision Milling

The Universal Tool Milling Machine XS8132A/X8132A is a high-performance machine tool engineered for a wide range of complex milling operations. Designed with robust construction and precise control mechanisms, it ensures stability and accuracy for intricate machining tasks. Its user-friendly interface makes it an ideal solution for professionals in tooling, manufacturing, and general machining environments.

Key Features

Machine Capabilities

CNC Control • Universal Milling • High-Precision • Tooling Operations

Model Numbers

XS8132A, X8132A

Technical Details

Machine Classification

Universal Tool Milling Machine
