

Universal TV Remote Control with Large Buttons

This universal remote control is designed for televisions. It features large, easily readable buttons and an ergonomic design for comfortable handling.

Overview

User-Friendly Universal Control

The URC53901A is a universal TV remote control specifically engineered for simplicity and reliability in high-traffic or specialized environments like hospitals, hotels, and senior living facilities. It features large, high-visibility buttons and a streamlined interface to ensure ease of use for elderly users or those with limited dexterity. With a focus on stability, the device includes locking mechanisms for both the programmed codes and the battery compartment to prevent accidental setting changes or tampering.

Key Features
