Overview

Professional Power Conversion

The NV-P1000 is a high-performance power inverter designed to convert 12V DC battery power into a clean, pure sine wave 220-240V AC output. Engineered for reliability, it features a robust aluminum housing with an advanced thermal management system, making it suitable for automotive, marine, and emergency power applications. With its integrated safety protections and versatile connectivity, it provides a dependable energy solution for running appliances and electronics anywhere.

Performance Specifications

Power Capacity

1000 W

Continuous Power

2000 W

Peak Power

Electrical Input/Output

Parameter	Value
Input Voltage	12V DC
Output Voltage	220-240V AC
Waveform	Pure Sine Wave

Safety and Connectivity

Protection Mechanisms

- Overload protection
- Short circuit protection
- Thermal protection

Certifications

CE

Construction

Housing and Cooling

- Ribbed aluminum housing
- Dual cooling fans
- Efficient thermal dissipation
